

## **Josephine McMurray**

### **Presentation Title: Measuring Health System Integration Through Regional Electronic Information Exchange: Making the Invisible Visible**

Josephine is a Doctoral Student in the IDEAS for Health Research Laboratory in the Department of Health Studies & Gerontology, University of Waterloo, and a Research Fellow with the Health System Performance Research Network. Her doctoral research focuses on the development of system level measures of integration, through the measurement of electronic information flows between healthcare providers; this is an extension of her research interests in health information technology adoption and use, and performance measurement. Josephine lectures in the Department of Business & Economics at Wilfrid Laurier University in organizational theory, and at the University of Waterloo where she teaches management & administration, and global health governance in the Department of Health Studies and Gerontology's Master in Public Health program. Josephine has worked in industry and the public sector holding variety of positions related to her qualification as a medical radiation technologist and her management experience in the health care sector.
